

A black and white photograph showing a group of people, including men and women, seated at small outdoor tables in front of a rustic stone building. The building features a prominent arched doorway and a sign with Chinese characters. The scene is set in a courtyard or garden area.

I have worked full time in the film industry since 1983. I spent my first eight years in Los Angeles in feature and commercial production. In 1992 I moved to Alaska and continue to work in film around the state, in the lower 48 and around the globe.
